OFFICIAL STATEMENT FROM THE RINKS AT EXETER

On Monday, August 10, the staff of The Rinks at Exeter was notified by a contact tracing company that a 14-year-old male player, who had been in our building on August 3rd and 4th for a camp put on by an outside company, tested positive for COVID-19.

Prior to attending the private camp, this same individual played in a tournament in Connecticut on July 31st- through August 2nd. When the player came to our facility, he showed no symptoms of COVID-19 and had no reason to believe he had been exposed. His family was notified on Tuesday, August 4 that teammates he played with in Connecticut had tested positive for COVID-19. The player was immediately removed from camp and was tested for COVID-19. While the individual player did test positive, his family members all tested negative. (Please note, only one player from the tournament in Connecticut attended the camp at the Rinks at Exeter.)

The private camp that the boy had attended at our facility was notified of the positive test. The camp director has reached out to everyone who may have come into contact with this individual. The Rinks at Exeter has not been made aware of any other players or personnel from that camp who have tested positive.

While there were other activities taking place on August 3rd and 4th at the Rinks at Exeter, they used other areas of the facility and were not in contact with the players or personnel associated with the private camp.

The health and safety of all of our guests at the Rinks at Exeter is our top priority. We extensively clean and sanitize our facility between games and clinics, including locker rooms, bathrooms and common spaces. We ask that everyone entering the building wear a mask, especially when you are unable to practice social distancing. The Rinks at Exeter continues to work with state and local health officials to ensure that our facility operates according to the guidelines set forth by the CDC and the State of New Hampshire.

If you have any questions or concerns, please contact us (603) 775-7423.
